PREFACE.

This Catalogue is presented to collectors with the assurance that its contents will in many instances convey information which all students in the science of numismatics will fully appreciate ; the opportunity now occurs to obtain varieties seldom found except in European collections, some of the varieties of United States coins being quite unknown until this ; and the small but choice selection of Ancient coins is made more intersting by the addition of the dates of coinage, which are determined by the events and inscriptions found thereon ; in all cases the coins are *guaranteed genuine and as described;* particular care has been taken in noting the varieties of United States fractional currency, which have lately been much sought for, many notes becoming rare in consequence, as all must in time, owing to the issue of silver coins to redeem all the currency issues.

Many collectors who have not had experience in purchasing at auction sales on account of living at too great distance from New York, may have their orders executed by the auctioneers, Messrs. Scott & Co., or other dealers, for a commission of 10 per cent. on amounts under $100—over $100 5 per cent.—a uniform charge of 50 cents made on any amount under $5.

In reference to the method of selling at auction, we would say that each lot is sold to the highest bidder, at so much for each coin in the lot (except in cases of proof sets), so if you desire a lot of coins which contains 10 pieces and you wish to pay $1.00 for it, you should bid 10 cents each. Always state your highest price, relying on the honor of those you employ to make the purchases for you at the lowest possible figure.

Messrs. SCOTT & COMPANY

Take great pleasure in announcing to the public that they have issued this day a work of great value to all interested in the history of their country, entitled

"Colonial Continental Confederate Currency,

" Their present market value.

" To which is added a complete Price List of

U. S. Fractional Currency.

Price - - - - 50 Cents.

It would be impossible at this date to claim that the list is perfect, but great care has been taken in its preparation, and every known variety of all the different kinds of paper money which have circulated in this country, has been tabulated according to date, so that any note is easily found, while the numerous full sized illustrations of Colonial and Continental money give material aid, likewise add interest to the book for the general reader. As an instance of its completeness we may call attention to the fact that 74 pieces of U. S. Fractional Currency are catalogued, while the highest number heretofore chronicled was only 48.

Besides being valuable as a check list of all uncurrent money issued by authority in this country, it is a comprehensive price list of Messrs. Scott & Company's large stock, the prices of which have been placed as low as the great and increasing demand for these interesting mementoes of our country's struggles for existence will admit of.
